**BLINDS**

## EXTERNAL SIDE RETAINED ZIP BLIND

WideScreen uses a 105mm tube to achieve widths up to 5.5m. Features include a height adjustable idle end and a clip-on side channel for face fix installation.

Available with a 150mm cassette or with open brackets.

The fabric is retained inside the channel. This allows you to raise and lower the blind to any position, offering increased light, wind, and rain protection. WideScreen also provides protection against insects when in the down position.

Reveal fix installations use a U channel to compensate for uneven openings.

The 25mm blade seal at the bottom of the blind compensates for uneven floors by providing a flexible bottom seal.

The specially designed YKK Zip provides a secure retention system while the independent teeth minimise the zip gathering as it rolls on the tube.

**EXTERNAL SIDE RETAINED ZIP BLIND**

- Motorised or Crank control.
- Zip system provides wind, weather and insect protection.
- Choice of Mode and Mode Zero Fabrics.
- Maximum Size Motorised 5.5m wide by 3.4m length.
